I think my review of the heavy cargo pack for Euro Truck Simulator 2 is equally applicable to this.

This DLC adds a significant addition to gameplay by adding longer, heavier trailers with different configurations. Interestingly the trailers are different to the one in Euro Truck Simulator 2. So the added variety make this definitely worth a play. I wouldn't recommend this DLC when you first start the game but once you have played for a bit and are enjoying it then this will appreciate this new dimension to the game.. It's basically special transport except that you don't take up 3 lanes and without the brake-checking police escort. 10V10. A great DLC to offer more deliveries. Works with TruckersMP as well!.
